

AVAILABILITY

Available for electric service to General Service customers with electric space heating. This schedule is not available for industrial heating or drying of raw products, paint etc., or parallel generation service. New customers shall be limited to peak loads no greater than 25 kW.

New customers after April 1, 2016 must heat their structure with a heat pump.

Where the electric heat equipment is separately metered for customers served prior to April 1, 2016, the Cooperative may separately calculate the bill for the separately metered heating equipment under this tariff and add to the remainder of the customer’s usage as billed under the General Service rate, provided that only one Service Availability Charge per location shall be billed per month.

This rate may be closed to new customers at any time by a vote of the Cooperative Board of Trustees without further notice.

CHARACTER OF SERVICE

Alternating current, 60 Hz (cycle), single phase or multiphase, at available secondary voltages not to exceed 480 volts.

MONTHLY RATE

Service Availability Charge	\$39.00
Demand Charge per Billing kW or part thereof	\$2.00
Energy Charge	
Summer Season	\$0.149339
Winter Season	\$0.057339

SEASONS

The winter season shall begin after the October meter reading and continue through the June meter reading.

The summer season shall begin after the June meter reading and continue through the October meter reading.

MINIMUM BILL

The minimum monthly bill shall be the Service Availability Charge plus any facilities charges or line extension charges.

BILLING COST ADJUSTMENTS

Energy sales under this schedule are subject to all billing adjustments including but not limited to the Power Cost Adjustment (Schedule PCA) and the Property Tax Adjustment (Schedule PTA).

DETERMINATION OF BILLING DEMAND

The billing demand shall be the peak monthly demand as established each month by an indicating or a recording demand meter for 15 consecutive minutes and may be adjusted for power factor and shall be rounded to the next full kW.

CONDITIONS OF SERVICE

All motors having a rated capacity in excess of 10 (ten) horsepower must be three-phase. All motors in excess of 40 (forty) horsepower will be equipped with starting equipment which limits starting current to 3 (three) times running current (Soft Start). Both power and lighting will be billed at the forgoing rate and served through a single meter. All motors shall be equipped with suitable under-voltage and overload protection in all current carrying conductors as recommended by the National Electric Code. The motors shall be equipped with the necessary equipment to protect it in the event any multiphase circuit should single phase. Highly fluctuating loads: Customer will not employ or utilize any equipment, appliance or device which

adversely affects the Cooperative's service to other customers. Where the customer uses electric service for the operation of hoists, welding machines, X-ray machines, electric furnaces or other equipment with intermittent or rapidly fluctuating load characteristics, which adversely affect the voltage regulation or impair the Cooperative's service to other customers, the customer operating the above equipment may be required to install and maintain at the Customer's expense suitable apparatus to reasonably limit the effect of such fluctuation and/or the Cooperative may adjust the billing basis provided in the Rate Schedule or Service Agreement to compensate for the necessary power capacity required to serve such equipment.

OTHER TERMS AND CONDITIONS

Service shall be rendered under the Cooperative's Rules and Regulations.

Electric space cooling and electric space heating shall be an approved installation designed to operate up to 480 volts single phase and/or multiphase and shall be permanently installed. After the April 1, 2016, the electric heat shall be an electric heat pump.

PAYMENT

All bills for service are due and payable in accordance with the Cooperative's Rules and Regulations.
